Promoting Healthier Connections with the World **Global Health Conference**

Department of Head and Neck Surgery
& Communication Sciences

Duke University School of Medicine

Dear Conference Attendee,

Thank you for choosing to spend your time and resources attending our **2024 “Promoting Healthier Connections with the World” Global Health Conference**, hosted by the Duke Department of Head and Neck Surgery & Communication Sciences.

We have assembled a broad representation of disciplines and international experts to hear directly from global leaders and learn about their amazing work and research. We are thrilled about the program featured in this booklet, which includes experts from nine different countries and covers topics that highlight collaborations and relationships within our shared global community.

At this conference, we hope you will not only learn, discover, and improve ways to connect with our world, but also foster new relationships and strengthen established friendships!

Finally, we extend our heartfelt gratitude to our industry partners, private donors, academic institutions, and foundational organizations for their generous support of this conference.

Sincerely,

A handwritten signature in black ink, appearing to read "Walter T. Lee". The signature is fluid and cursive, with a large initial "W" and "L".

Walter T. Lee MD, MHS
Conference Chair

On behalf of the Conference Planning Committee: Trinitia Cannon, David Kaylie, Robbie Patterson, Liana Puscas, Chris Tobias, Nosa Osazuwa-Peters, Aleksandra Zabiran, Sylvia Garrett, and Lori Allsbrook

PLATINUM LEVEL

sanofi

REGENERON

Sanofi is dedicated to supporting people through their health challenges. We are a global biopharmaceutical company focused on human health. We stand by the few who suffer from rare diseases and the millions with long-term chronic conditions. With more than 100,000 people in 100 countries, Sanofi is transforming scientific innovation around the globe.

Regeneron is a leading biotechnology company that invents medicines for people with serious diseases. Founded and led for over 30 years by physician-scientists, our unique ability to repeatedly and consistently translate science into medicine has led to multiple FDA-approved treatments, almost all of which were homegrown in our laboratories.
